- Microsoft Office
- Visual Studio
- GIT
- SourceTree (Mecurial)

LANGUAGES:

- HTML
- CSS
- C++
- C#
- JavaScript
- VBA

EXPERIENCE

GENERAL ASSISTANT • SAINSBURY'S •

18th November 2015 – Current Day

I started my job at Sainsbury's as a part time general colleague in November 2015. I began working in the Bakery department, but have worked on all departments during my 2 years at the company across 2 different stores (Telford and Cheltenham) which I transfer between during Holidays.

WEBSITE DEVELOPMENT • THESTUDIO4 • WORK EXPERIENCE

15th June 2015 – 27th June 2015

For my work experience at Sixth form, I worked at a small website development company located in my hometown. Whilst working there I had to create websites based off designs using different frameworks such as Bootstrap and Skeleton. One of which is live on the web and can be seen on my portfolio. This job required me to work along side a small dev team, keeping them updated on my progress and keeping my work well-documented.
